

I listen to XM radio whenever I am in my car. I am especially pleased that XM radio offers three classical music channels. There has been little classical music available in the Detroit on AM or FM broadcasts for several years. I like the traffic and weather reports on XM because the information is available on demand. I can turn to the traffic channel and get an update at any time, a real convenience. My wife liked the choice of music channels on my XM radio so much I had to buy one for her car. My experience with XM radio has been so pleasing because the range of choices is much broader than standard AM or FM radio. I respectfully urge the FCC reject the NAB's petition 04-160 and recommend that the FCC support the range of programming available on XM radio be maintained or expanded.
